Hearing Newsletter

Winter 2008

Dear Readers,

Winter is here again and I am sure you will all agree that we have been fortunate to have received some welcome rainfall recently.

In this edition of our Newsletter we have some very exciting news for our new and loyal clients. Our new 5 Year Maintenance Plan should be financially beneficial to many of our clients.

We will also touch on some aspects of the new digital hearing aids which have recently been released. Aids are getting smaller every year! We have provided an overview on the following page. Great news - blue tooth technology has now been integrated to work with hearing aids. This new technology will be specifically useful to mobile phone users.

Katia Peeters

Falls of Sound has celebrated our first 'in-house' wedding. Diane, who is the daughter of our Receptionist Cynthia, was married to Oscar Lenden on 10th May 2008.

The marriage took place at OLR in Kenmore and the reception was held at the Indooroopilly Golf Club.

Fun was had by all.

TIP: Keep ears free of wax by using wax removal drops to soften wax. Use for no more than 4 consecutive days. If needed ask your doctor to remove stubborn wax from your ears, but always use the wax softening drops before having wax removed by your GP as it could be a painful procedure.

NEW - 5 YEAR MAINTENANCE PLAN FOR THE SERVICE AND ADJUSTMENT OF HEARING AIDS

As part of our ongoing service to our clients, Falls of Sound are pleased to announce that we will be introducing a **NEW**

Free 5 Year Hearing Aid Maintenance Plan

We are interested in making sure your hearing aid/s will be continuously serviced so that clients are able to receive the maximum benefit from wearing their selected hearing aids.

All new clients will receive a *5 Year Maintenance Card* when purchasing new hearing aids.

Clients who have purchased hearing aids from our clinic in the past will also be able to benefit from our *5 Year Maintenance Plan* and those clients will also receive this new maintenance card to cover the remainder of the allocated services and adjustments up to 5 years from the original fitting date of their aid/s.

We trust this new maintenance option will be of benefit to you by easing the burden of the costs involved for maintaining and servicing your hearing aid/s. We look forward to seeing you all at Falls of Sound on a regular basis for your hearing aid maintenance.

Please note that this Maintenance Plan does not apply to our clients who are pensioners or veterans on the Australian Government Hearing Services Program as those clients receive similar benefits.

What's your Vibe?

No matter how you choose to face the world, you need to stay in touch.

Vibe helps you do it with style. Siemens Vibe. It's time to live out loud.

Siemens Pure® lets nothing come between you and your world. Pure hearing instruments are incredibly discreet; in fact they're almost invisible when worn, so you can be you. But don't let their size fool you, they're packed with state-of-the-art features.

Pure power

It's tiny, but it's mighty. With the flexibility of three different power levels, Pure has been perfectly engineered to give you exactly the strength you need, whether your hearing loss is mild or moderately severe. Pure. It takes performance to a powerful new level.

Pure convenience

It doesn't get any easier than this. Pure is all about keeping things simple. It automatically synchronizes, analyzes, and adjusts volume and sound processing — so you won't have to. Even in the most difficult listening environments there's no fiddling with your instrument, no awkward adjustments. Now, hearing is more natural, more effortless than ever.

Pure individuality

Pure is all about you. Available in an array of natural hair colors and skin tones, Pure blends in perfectly, so you're the one who stands out. And Pure doesn't just match your appearance; it automatically adjusts volume and program settings to match your surroundings, so your hearing experience is completely customized. With a choice of configurations, program options, fits, and colors, Pure puts you in control.

Link to your....

Tek Connect a remote control specifically designed to meet the needs of today's interactive hearing instrument wearer. It's time for everything to get into sync.

Mobile,

Hear the call in both ears. Now there is an easier way to connect with your phone(mobile or landline). Answer calls from a button on Tek Connect. Get the signal directly in both hearing aids. Leave your phone in your pocket. Life is easy.

Music,

Every note in stereo. Tek connect streams stereo sound wirelessly from your audio system or MP3 player right to your hearing aids.

Television

In stereo, no disturbance, no feedback, DVD or just watching television directly to your hearing aids, there's no need to fight over the volume control, sounds good, doesn't it?
